BF3500 FLEXIWRAP SERIES

BF3500 FlexiWrap – high capacity for one-man operations

**High-density baling and accurate bale transfer:
the perfect solution for integrated baling and wrapping!**

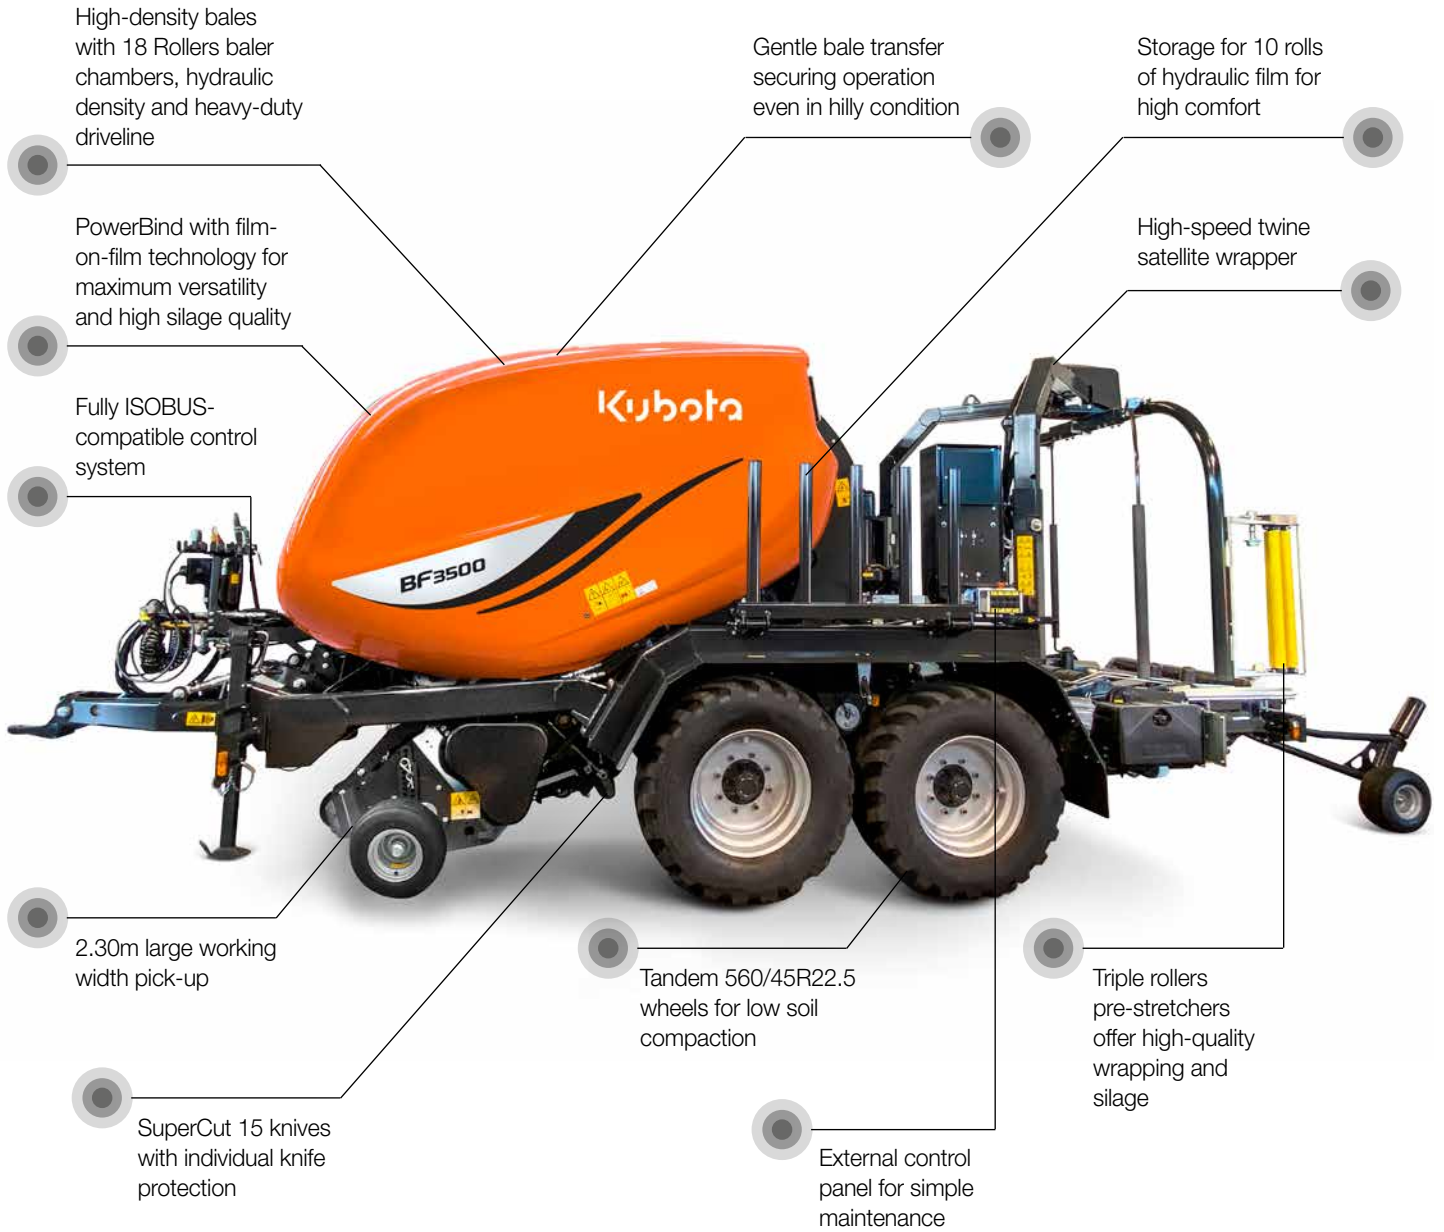

One-man baling and wrapping combination

The new Kubota BF3500 FlexiWrap model is designed to ensure high-density baling and fast and accurate bale transfer. This machine offers an integrated solution for baling and wrapping in a single pass, making it perfect for one-man operations.

Strong and durable chassis

The newly designed wrap-around chassis has been optimised to minimise crop build-up. The new Kubota BF3500 FlexiWrap baler wrapper combination also features a twin satellite wrapper built around a strong and durable tandem axle chassis, ensuring maximum stability.

The 560/45R22.5 flotation tyres also deliver an evenly distributed weight for reduced ground compaction in the field, while also providing greater stability during road transport.

Model	Kubota BF3500 FlexiWrap	
Bale chamber		
Bale chamber size	(m)	ø1.25 x 1.23
Number of rollers	(nb)	18
